Problem statement:

Our international users are having a difficult time properly speaking their newly learned language to their English friends. Our solution will help translate broken English in order to help the user speak more fluently.

Who is experiencing the problem:

Many international users who wish to learn English better.

What is the problem:

Users want to speak English more fluently.

Where does the problem present itself:

Any place where there is a conversation between 2 people of different languages.

Why does it matter:

People are unable to express themselves in conversation with their friends, coworkers, family, and many more.
